

SURGERY / ANESTHESIA CONSENT FORM

CAMPBELL PARK ANIMAL HOSPITAL

PETS NAME: _____

PROCEDURE: _____

The goal of Campbell Park Animal Hospital is to provide the safest surgical/anesthetic experience possible. The more information the doctors have before and during a procedure, the greater the reduction of risk that a problem will occur. Our doctors recommend I.V catheter, electronic monitoring and pre-surgical blood chemistry and CBC (complete blood count). Blood chemistries help our doctors screen for potential causes of illness accurately, safely and quickly. Electronic Monitoring (B.P., Pulse Oximeter, EKG) is recommended to help screen for and identify certain cardiac problems, while an IV catheter provides venous access and proper cardiovascular support during anesthesia. While we utilize the safest anesthetic protocols possible, these pre-anesthetic recommendations are for any pet undergoing surgery.

The following recommendations are in addition to the cost of the surgery:

Add'l Costs

are:	IV Catheter	\$20.00	I Accept _____	I Decline _____
	Electronic Monitoring	\$25.00	I Accept _____	I Decline _____
	Blood Chemistry/CBC	\$99.00	I Accept _____	I Decline _____
	Post-Op Pain Medication		I Accept _____	I Decline _____
	24 Hour PetWatch Microchip	\$35.00	I Accept _____	I Decline _____

I accept all responsibility that my pet is in good health prior to surgery and that all food has been withheld since 8 pm on the night prior to surgery. I am aware of the risk involved and release Campbell Park Animal Hospital, Inc. and its Staff from any legal and financial responsibilities arising from the procedure.

I have read and understand the above recommendations and assume financial responsibility incurred for the procedure(s) and any recommendations chosen.
